

Newbie Lesson Plan – Relevant Subjects

Accounting A-Level – years 12 & 13

The lesson plan is relevant to Accounting A-Level students with particular reference to the topic of Financial and Management Accounting. Students are required to report on the performance of sole traders and limited companies with focus on evaluating the financial strengths and weaknesses. Students should be able to support their comments with evidence and should be able to recommend courses of action which will benefit the business and explain the consequences of failing to take remedial action.

Business Studies A-Level years 12 & 13

The lesson plan is relevant to Business Studies A-Level students with particular reference to the topics of Financial Strategies and Accounts and The Business Environment and Managing Change. Students are required to measure performance and devise strategy based on financial performance. In particular the lesson plan is a good fit with regards to looking at the relationship between businesses and external factors and how change can be influenced.

Economics A-Level years 12 & 13

This lesson plan is relevant to Economics A-Level students with particular reference to critical analysis and analysing the external environment. Students are required to assess how external factors drive supply and demand and how this impacts a business financially.

Business – BTEC National Diploma – year 13 only

This lesson plan can be used with those studying Business at National Diploma level. It's recommended for year 13 students as they will be in their final year of the diploma gaining a good understanding of management accounting and how it can impact the world of business.
